

Drive Ltd

Drive's position with the development of self directed support in Wales:

- We feel strongly that user involvement in developing In Control systems and Processes in Wales ought to be maximized and will seek to do this with our internal work. We were also pleased to hear that Learning Disability Wales have plans to take user involvement in In Control forward across Wales.
- We are continuing to explore establishing Individual Service Budgets based upon sound person Centred Planning with our partners from Monmouthshire county Council, who accompanied us to the recent event in Llandridnod Wells.
